

OAK – Starter Kit

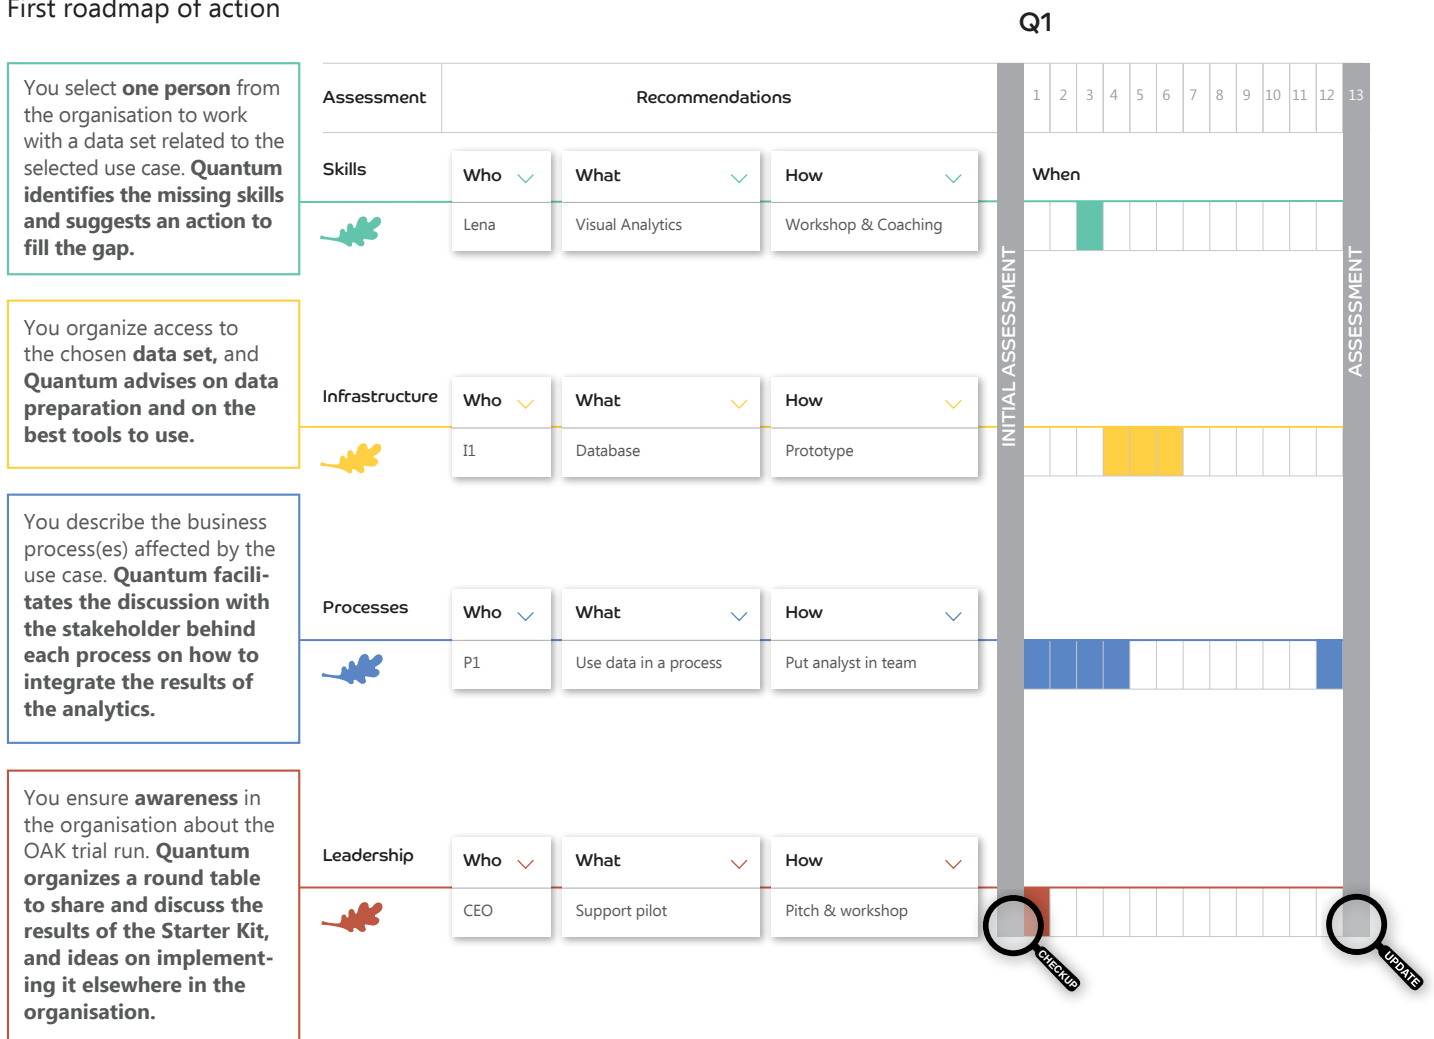

Start small, start today – Results within weeks

With the OAK Starter Kit you can easily try out and benefit from the value of the OAK approach. Just **select a current and pressing use case within your company** and see how data analytics can help steer operations, reduce risks, plan strategies... and make a difference!

For each of the four development areas, we help you choose and implement at least one action.

About Quantum

Quantum is a data science and analytics company, located in the center of Zurich. We help clients to use digital information to steer their business. We enable the customer by identifying and filling gaps in skills, methods, infrastructure, processes and leadership, working across all levels in the organization. We combine management experience and business knowledge with the application, implementation and teaching of scientific methods of data analysis, data management, reporting, modern visualization, statistics and machine learning to exploit digital information.
