

Secrets of Tableau Server Administration at your fingertips

This training provides in-depth coverage of Tableau Server administration, including managing content, users, and permissions. The course includes hands-on activities to reinforce the skills and knowledge attained.

Target Audience

The expertise and skills acquired are best geared towards those who will be administering the Tableau Server installation. There are no Tableau-specific knowledge prerequisites.

Content

User interactions with Tableau Server / Tableau Server components
Single-server installation / Content administration
Authorization and permissions / Users, groups, and sites
Data sources and extracts / Schedules, tasks, and subscriptions
Monitoring server status / Command-line utilities and REST API
Upgrading a single-server installation to a new version
Modifying the authentication method

Practical Information

1 full-day session or 2 half-day sessions
Available in English or German
The course is held at Quantum's facilities in Zürich
Participants will use their own laptop (please indicate if this is not possible) with Tableau installed on it – or download the latest Tableau Free Trial version at www.quantumanalytics.ch

Price

CHF 990.– per person excl. VAT, with a minimum of 2 and maximum of 5 participants (More people? Please enquire at tableau@qbis.ch)

Date

About Quantum

Quantum is a data science and analytics company, located in the center of Zurich. We help clients to identify their most valuable customers, products, or services; determine potential risks; discover hidden potential in their markets; pinpoint and eliminate bottlenecks and inefficiencies; and provide other insights to steer their business. We do this by combining business experience and knowledge with the application, implementation and teaching of scientific methods of data analysis, data management, reporting and modern visualisation to turn data into information.
