

# Graph Solutions

Take advantage of graph methods and technology to leverage the complex patterns hiding in your data and gain deeper insights into your business.

- True transparency in your sales funnel
- Finding clusters of products and services that sell
- Data lineage for compliance (GDPR) or due diligence
- Fraud detection
- Queryable inventory of systems, users and data
- Better governance through a digital business process landscape
- Customer relationship network

With the right combination from **Quantum's Graph Solutions Menu**, you can connect data as it is stored, giving you visualization and analysis options between the interconnected data to discover complex data patterns and generate insight from your data. Because sometimes, the relationships between data points tell you more than the points themselves.

Starting with an audit workshop, we work with you to find which combination of menu items best fit your needs. We create a roadmap and then – step-by-step – go about achieving the desired results. And by finding the right combination, we're able to make your investment a low-risk way to add value to your organization.

## Possible Components

- 1 **Identify business cases**
- 2 **Design graph model**
- 3 **Set up dedicated graph database**
- 4 **Populate the graph model**
- 5 **Visualize the network** to let our brains seek patterns
- 6 **Analyze the network** with the help of algorithms for further pattern recognition
- 7 **Define and setup interfaces for others** (e.g. Sales Reps) to use the graph environment
- 8 **Map business problems** with the graph approach
- 9 **Integrate graph databases** into business processes
- 10 **Make your Visio diagrams come alive** and queryable
- 11 **Extend your BI/Data warehouse world** with graph perspectives
- 12 **Identify segments or communities** in your customer base
- 13 **Inventory Platform** for data usage, systems, processes, projects, products and services
- 14 **Training and courses** to learn graph databases, graph analytics and graph visualisation
- 15 **Coaching** - your "personal trainer" service for making basic learning stick

## Typical Combinations
